

Surveillance

Surveillance is the monitoring of behaviour and activities for the purpose of gathering information.

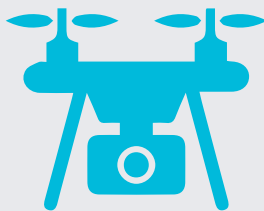

It's one of the most useful tools a private investigator has to offer.

Our experienced and highly trained investigators gather information by tracking a person of interest's movements either remotely, or physically.

The types of surveillance we offer are:

- ✓ Physical Surveillance
- ✓ Drone Surveillance
- ✓ Aerial Surveillance
- ✓ Counter Surveillance
- ✓ Digital Surveillance
- ✓ Subrosa Surveillance

MSG investigators are available 24/7, using cutting edge technology, innovation and experienced tactics and procedures to provide you with due diligence and an increased sense of security. This helps to prevent crime and reduces costs.
